Body Dissatisfaction in Adolescents with Eating Disorders Hannah Moss, 2011
The Relationships Between Alexithymia, Perfectionism, Self-esteem, Ethnicity and Body Image Disturbance Whitney Alexis Kantack, 2014 Body image disturbance is a pervasive problem in this country that is associated with eating disorder pathology, depression, anxiety, and other psychological problems. Very few studies have attempted to examine body distortion (the more severe form of body dissatisfaction) as it relates to alexithymia, perfectionism, perfectionistic self-presentation, self-esteem, ethnicity, and ethnic identity. This study explored the relationships between body satisfaction/dissatisfaction and body distortion with alexithymia, self-esteem, and perfectionism and ethnicity variables through the use of the following measures: Toronto Alexithymia Scale (TAS), Frost Multidimensional Perfectionism Scale (FMPS), Perfectionistic Self-Presentation Scale (PSPS), Rosenberg Self-Esteem Scale (RSES), Multigroup Ethnic Identity Measure (MEIM), Appearance Evaluation and Body Areas Satisfaction subscales of the Multidimensional Body Self-Relations Questionnaire (MBSRQ), Photographic Figure Rating Scale (PFRS), and Eating Attitudes Test (EAT). Participants included 151 females of all ethnicities between the ages of 18 and 65 (Mage = 29.98 years). Results indicated that self-esteem was the most significant predictor of body satisfaction. Additionally, greater body satisfaction was associated with lower levels of alexithymia, perfectionism, and perfectionistic self-presentation and higher levels of ethnic identity. Body satisfaction also was found to mediate the relationship between ethnic identity and body distortion. Further, body satisfaction was found to vary based on age, parent education, and parent SES. These findings present important information on psychosocial factors which influence body dissatisfaction.

**Handbook of Positive Body Image and Embodiment** Niva Piran, 2019-04-02 For five decades, negative body image has been a major focus of study due to its association with psychological and social morbidity, including eating disorders. However, more recently the body image construct has broadened to include positive ways of living in the body, enabling greater understanding of embodied well-being, as well as protective factors and interventions to guide the prevention and treatment of eating disorders. Handbook of Positive Body Image and Embodiment is the first comprehensive, research-based resource to address the breadth of innovative theoretical concepts and related practices concerning positive ways of living in the body, including positive body image and embodiment. Presenting 37 chapters by world-renowned experts in body image and eating behaviors, this state-of-the-art collection delineates constructs of positive body image and embodiment, as well as social environments (such as families, peers, schools, media, and the Internet) and therapeutic processes that can enhance them. Constructs examined include positive embodiment, body appreciation, body functionality, body image flexibility, broad conceptualization of beauty, intuitive eating, and attuned sexuality. Also discussed are protective factors, such as environments that promote body acceptance, personal safety, diversity, and activism, and a resistant stance towards objectification, media images, and restrictive feminine ideals. The handbook also explores how therapeutic interventions (including Acceptance and Commitment Therapy, Cognitive Dissonance, and many more) and public health and policy initiatives can inform scholarly, clinical, and prevention-based work in the field of eating disorders.

**Exploring Moderators of the Relationship Between Maladaptive Perfectionism and Eating Disorder**
**Symptomatology Among College Women** Samantha Koch, 2006

Abstract: In recent years, the relationship between eating disorder symptomatology and perfectionism has been the subject of much study; however, research has not been consistent on whether a relationship exists between these two variables. Therefore, the present study investigated whether third variables (i.e., body surveillance, body shame, and self-esteem) moderated this relationship with 307 college women. Hierarchical multiple regression analyses indicated that the proposed variables did not moderate the relationship between maladaptive perfectionism and eating disorder symptomatology. However, it was noted that maladaptive perfectionism directly contributed unique variance to eating disorder symptomatology above and beyond the variance of the proposed moderators, suggesting that it is a unique predictor of disordered eating for college women.

**Body Image** Sarah Grogan, 2002-01-04

Body Image: Understanding Body Dissatisfaction in Men, Women and Children presents a review of what is presently known and the results of some new research on body image. It compares the effects of gender, sexuality, social class, age and ethnicity on satisfaction with the way we look and suggests how these differences arise. Why, for instance, are heterosexual men much happier with their body images than women or gay men? Sarah Grogan discusses the effect of media presentation of the ideal body and other cultural influences. Surprisingly, despite the almost
exclusive media preference for very young female bodies, she finds that older women are not less satisfied with their bodies than younger women. Written for readers from a variety of disciplines, this clear and eclectic book will make the ideal text for students from psychology, sociology, gender and media studies.

Human Nature and Suffering Paul Gilbert, 2016-08-05 Human Nature and Suffering is a profound comment on the human condition, from the perspective of evolutionary psychology. Paul Gilbert explores the implications of humans as evolved social animals, suggesting that evolution has given rise to a varied set of social competencies, which form the basis of our personal knowledge and understanding. Gilbert shows how our primitive competencies become modified by experience - both satisfactorily and unsatisfactorily. He highlights how cultural factors may modify and activate many of these primitive competencies, leading to pathology proneness and behaviours that are collectively survival threatening. These varied themes are brought together to indicate how the social construction of self arises from the organization of knowledge encoded within the competencies. This Classic Edition features a new introduction from the author, bringing Gilbert's early work to a new audience. The book will be of interest to clinicians, researchers and historians in the field of psychology.

The Roles of Maladaptive Perfectionism and Self-esteem in the Relationship Between Perceived Incompetence and Disordered Eating Amanda G. Ferrier, 2007

*Body Image* Marlene V. Kindes, 2006 Western culture has increasingly valued physical appearance and in particular slenderness in the last 20 years. Unrealistic targets of thinness and excessive weight loss have led to eating disorders, the idea of obligatory exercise and other mental health problems. The concept of dissatisfaction with one's body image is driven home by images of ultra-thin models appearing in newspapers, magazines and television. This book brings together leading international research in this alarming and growing field.

Perfectionism, Health, and Well-Being
Fuschia M. Sirois, Danielle S. Molnar, 2015-09-14
This book brings together the world’s leading perfectionism researchers and theorists to present their latest findings and ideas on how and why perfectionism may confer risks or benefits for health and well-being, as well as the contexts which may shape these relationships. In addition to providing an overview of the latest research in this field, this volume explores new conceptual models that may help further our understanding of when, how, and why perfectionism may be implicated in health and well-being. After presenting an overview of the conceptual and measurement issues surrounding the concepts of perfectionism, health, and well-being, three sections address the implications of perfectionism for health and well-being. The first of these sections provides an overview of research and theory on the role of perfectionism in health and illness, health behaviors, and chronic illness. The next section of the book focuses on the cognitive and affective underpinnings of perfectionism as they relate to psychopathology, distress, and well-being, including how it applies to eating disorders, depression, and anxiety. The final section of the book explores specific contexts and how they may contour the associations of perfectionism with health and well-being, such as in the domains of interpersonal relationships, academic pursuits, and work-related settings. Perfectionism and well-being is a topic not just for researchers and scholars, but clinicians and practitioners as well. For this reason, chapters also include a discussion of prevention and treatment issues surrounding perfectionism where relevant. By doing so, this volume is an important resource for not only researchers, but also for those who may wish to use it in applied and clinical settings. By presenting the latest theory and research on perfectionism, health, and well-being with a translational focus, Perfectionism, Health, and Well-Being makes a unique and significant contribution to perfectionism as well as general wellness literature, and highlights the need to address the burden of perfectionism for health and well-being.
